

ALTERA

ALTERA
glamping

Produced by
ORGANIC-CONCEPT

ORGANIC-CONCEPT

One system with multiple configurations.

Any terrain. Any environment.

Designed and engineered as luxury temporary accommodation for eco-sensitive environments, these ingeniously simple modular timber-frame and stretch tent structures are quickly installed and easily relocated or removed – leaving behind only a lasting impression of quality, comfort and clever design.

Leave no trace...

Fast, simple build

Designed for quick installation and easy removal, the ALTERA GLAMPING is a modular system constructed with pre-fabricated timber beams and posts designed to standard dimensions.

→ *With our fast-build universal joining system, pre-fabricated modular elements simply lock together to assemble the frame. This makes it possible for the structure to be built by a small team with only basic training,*

→ *As the structure is considered temporary and removable, costly and time-consuming planning approvals will not be necessary.*

Interchangeable Wall Panels

Soft wall and ceiling panels simply slide into the frame while hard panels are bolted into form a watertight seal

Transport

Units are easily transported to remote locations with a flatbed trailer or small truck.

Zero impact

From sand to snow to sloping or uneven ground, custom engineered selflevelling feet make it possible to build units on just about any terrain – turning unused land into an income-generating asset and giving you the freedom to relocate units leaving no trace behind.

Units are elevated on galvanised steel feet and simply levelled by adjusting the height of each foot. This removes the need for foundations that may leave unsightly scars on the environment when the unit is removed or relocated.

Off the ground elevation offers a number of further advantages namely:

- *The unit is less prone to weathering*
- *Elevated units are warmer in colder climates*
- *Plumbing and electrical services are more accessible*
- *Snakes and other creatures are less likely to make an unwanted appearance*

Self-levelling feet
Self-levelling feet are custom engineered from high quality galvanised steel, offering a 25 year warranty.

A totally organic
experience...

Modular design

*The ALTERA GLAMPING is a scalable structure you can configure to meet your needs. Modular interlocking units of standard dimensions connect together to create multiple floor plans.**

*Decks can be placed on any side.
Stairs can be clipped on at any
access point.*

*Bedrooms, bathrooms and/or decks
can be added after-build, simply by
plugging into the existing structure.*

** The ALTERA STRETCH TENTS are designed to fit a particular configuration. When a floor plan changes, a new stretch tent design may be required.*

Scale the size, configure the floor plan and select panelling options to meet your exact requirements.

The internal space can be re-configured by clipping internal walls to different points on the frame.

Interchangeable Wall Panels

The ALTERA GLAMPING can be configured with soft walls and ceiling panels to create a temporary tent-like feel or soft elements can be easily interchanged for hard walls and ceilings.

The way to a perfect wind

Off-the-grid

Our off-the-grid ablution and power solutions make it possible for you to locate your ALTERA GLAMPING anywhere. We cater for three basic scenarios:

→ **There is water and electricity which is conveniently located**
In this case all that is required is a small distribution board with a 12 Volt transformer and a water connection shut-off valve. The hot water system is a compact electric system located beneath the basin. The shower includes a pumped sump to pump waste water into a suitable tank or soakaway.

→ **There is water but no electricity**
In this case a solar system with a battery, a solar panel and charge controller is required along with a digital gas geyser and gas bottle. The shower includes a pumped sump to pump waste water into a suitable tank or soakaway.

→ **There is neither water nor electricity**
In this case a solar powered system is required which would include a battery, a solar panel, a charge controller plus a digital gas geyser with gas bottle and a 12 Volt 11.6 L/pm pump. The shower includes a pumped sump to pump waste water into a suitable tank or soak-away and a 1000 L rainwater tank supplies water to the unit.

Depending on solar conditions (shade and latitude) an 80 Watt solar panel (or larger and a 105 Amp/hr high cycle battery (or more can produce around 6.5 amps per hour for around 6 hours per day – pushing approximately 40 Amp/hrs back into the battery each sunny day which will provide sufficient energy to power the pumps and LED lighting.

Transport your
guests to prime
locations and deliver
out-of-the-ordinary
experiences with the
ultimate escape into
the wild.

Natural appeal

With the organic curves of the stretch tent and its rustic timber elements, the ALTERA GLAMPING is a beautiful complement to any natural setting.

Organic Look

The ALTERA STRETCH TENT lends an inviting and luxurious feel to the entire unit. Muted, natural colour options and the tent's organic curves are a beautiful complement to any natural setting.

Sustainable Materials

Unit frames, sub floors and decks are built entirely from sustainably sourced and treated Pine or hard-wearing grandis offering a predicted lifespan of 10 – 25 years, depending on weather conditions.

One with Nature

Soft fabric walls can be unzipped on three sides and rolled up entirely to open up the ALTERA GLAMPING to its scenic surrounds.

Eco luxury that
blends seamlessly
with the landscape

All the comforts

Wherever you choose to install your ALTERA GLAMPING, our climate-friendly build options are designed to ensure absolute comfort and our range of finishing options cater for both luxurious and rustic accommodation styles.

Scale luxury and comfort factors up or down to suit your accommodation style and weather.

Unequaled Luxury...

Soft Fabric Panels

Soft fabric walls and ceilings create a romantic tent-like atmosphere and can be solid or windowed. The fabric slides into a Keder rail track attached to the wooden frame, creating a weather-tight seal and a flat tensioned wall. These walls can be unzipped on three sides and rolled up entirely to open out to the surroundings. The tri-layer window system consisting of an external Ripstop canvas 'blind', a fixed mosquito net and a clear internal roll-up PVC window provides both privacy and protection from insects and the weather respectively.

Tri-layer Window System

Available Colour Options

Solid Soft Wall

High Window in Solid Soft Wall

Window in Solid Soft Wall

Standard Door in Solid Soft Wall

Soft walls are also printable with any design & in full color. Great for branding.

Hard Panels

Where climate or security is a concern, or a different aesthetic is required, the modular design of Organic Tent House allows for hard panel wall and ceiling alternatives. Hard wall alternatives include solid wood, glass, aluminium or cladded panels. Standard-sized aluminium windows and sliding doors panels are also available. Custom panels of the same dimension can be installed easily and cost-efficiently.

Choose between practical alternatives to match your requirements.

Cool Protection

The ALTERA STRETCH TENT creates an expansive feeling of space around the unit, forming a protective barrier between the structure and sun or rain. The deep eaves also provide shade and watertight protection across the entire deck area.

Our engineered tent fabrics offer global fire standards with a range of natural tones available.

Stretch tent poles are available in aluminium, pine or grandis timber. Other options are also available.

Insulation & Heating

Colder climates demand fully insulated units and the ALTERA GLAMPING delivers with foil insulated hard wall panelling options and foam insulation installed between floor joists. Add a romantic and cozy ambience with gas fireplaces options.

Provide absolute comfort no matter the weather.

Insulated sub-floors and wall panels are available.

Bathrooms, Mini Bars & Kitchenettes

Units are available with or without bathroom facilities. Our 4 m², 6 m² or 12 m² bathroom modules can either plug into an existing structure or be included in the main floor plan. Solutions are available for both 'off-the-grid' and fullyserviced scenarios. Any custom fixture or fitting meeting the service requirements can be fitted on site by your own supplier to meet your level of luxury.

Coal-Fired Hot Tubs

What could be better than enjoying a hot tub on your private deck overlooking an incredible view? We offer wood-fired hot tubs made from ultra-light, but very sturdy material and filled with self-expanding foam. These hot tubs do not need an electrical outlet or installation. The water is heated via an aluminum woodfired stove that fits neatly into a corner and is well shielded to prevent injuries.

Flooring Options

Choose from a range of flooring finishes including WISABirch floor, engineered laminated and vinyl plank flooring, as well as natural carpeting options like hard-wearing coir.

Fit your own fixtures and finishes or ours to meet your level of luxury.

*Connect with nature
and each other...*

Nature... that's
what luxury really is

Multi-purpose application

From a small, luxury glamping cabin to a 'village' of structures built for a market day, the ALTERA GLAMPING scales to meet the requirements of a wide variety of applications.

Multiple units make an ideal and highly configurable solution for markets.

Offer 5-star luxury glamping accommodation in wilderness areas

Transport your guests to prime locations and deliver out-of-the-ordinary experiences with the ultimate escape into the wild. The ALTERA GLAMPING delivers a full off-the-grid experience, moving wherever the action, land or seasons takes you.

Capitalise on increased demand for isolated getaway options

The Organic Tent House is an ideal income-generating solution for private landowners looking to capitalize on unused land and the increasing demand for luxury getaway options that take holidaymakers off the beaten track.

Open for business this season with an engaging and sociable space customers will naturally gravitate to

The ALTERA GLAMPING opens the way for businesses with temporary location operating rights to pop up and down for business as the season blows, packing down to a neat container that can be easily stowed until the following season.

Expand existing accommodation quickly and easily

Designed as accommodation-on-demand, the ALTERA GLAMPING can pop-up as an instant solution for resorts, campsites and festivals where supporting amenities are available. Constructed in under 8 hours with a small team, it is the answer to capacity overflow or where quick and easy volume accommodation is required.

Provide scalable accommodation for talent and crew on location

Scaling the size and finishes up or down, the Organic Tent House is an ideal fast-build solution for crew accommodation on location.
